Cameras with Through-the-lens Viewing!

greater control in creative picture-taking . . . see exactly what picture will look like

Penta-prism viewfinder lets you see through the lens for precision focusing and picture composition

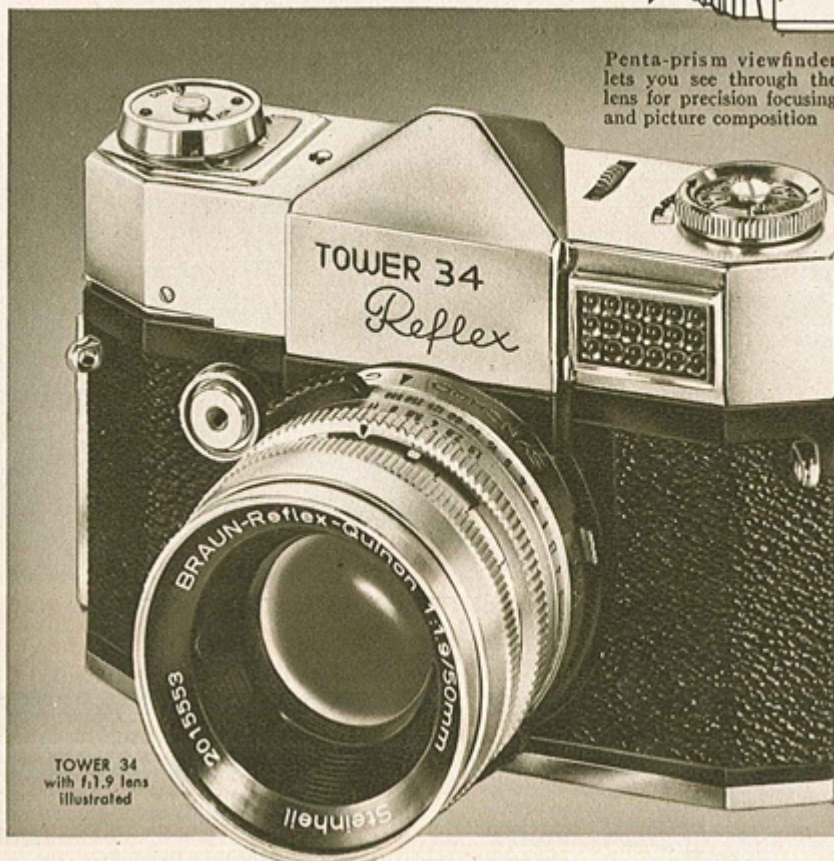

Look What You Get With the All new TOWER 33 and 34 Reflex

- **Coupled exposure meter.** . . . synchro-Compur shutter. Correct shutter speed and lens stop set automatically as you turn adjusting wheel on top of camera
- **Automatic diaphragm control.** See your picture big and bright through wide-open lens. Diaphragm automatically closes down to preset lens opening when you shoot . . . snaps wide open again when film is advanced
- **True lens interchangeability.** Use wide-angle or telephoto lenses with no parallax problem. All lenses couple to rangefinder, meter and automatic diaphragm.

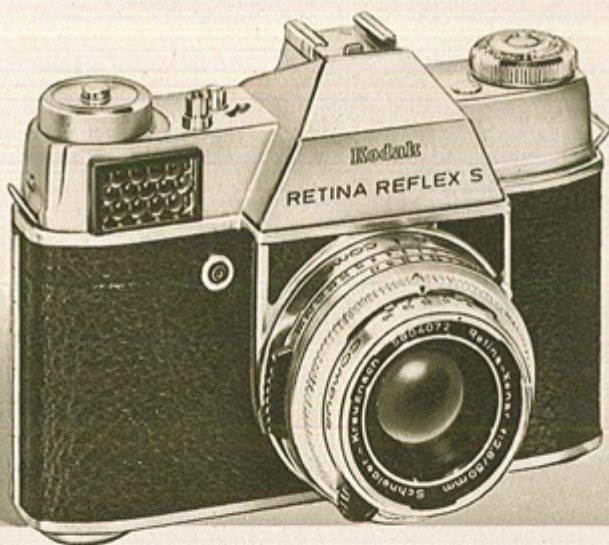

TOWER 33 with f:2.8 lens **\$133⁹⁵** TOWER 34 with f:1.9 lens **\$158⁹⁵**

Compare . . . see why we believe this new TOWER reflex offers more for the money than any other single-lens reflex camera! You get penta-prism, through-the-lens viewing PLUS rangefinder focusing. So fast, and really simple to use—without figuring "f" stops or shutter speeds. Just a flick of your finger, and the TOWER reflex automatically gives you correct exposure and shutter speeds for any shot, in any light. Depth-of-field indicator adjusts automatically as you focus. Rapid film advance and shutter cocking. 10 shutter speeds from 1 to 1/500 sec., plus time. Self timer. Synchronized for bulbs or electronic flash (see 3 CA 8706 flash on page 44). Metal body, leather cover. TOWER 33 uses series 6 filters; TOWER 34 uses series 7 filters, order screw-in filter adapter rings below. Made in Western Germany.
