Décentrement vertical :	Oui	Second viseur :	
Type de viseur :	Image réelle sur diapositive		

Lafayette était un vendeur américain par correspondance, principalement de postes de radio. La société est apparue au cours des années 20. Au cours de son existence, elle a multiplié les points de ventes. A l'époque de la CB, Lafayette a fait de mauvais choix techniques. Son concurrent, Radio Shack en fit d'autres. Lafayette perdit et disparut à la fin des années 70.

Lafayette a complété son offre Radio en vendant d'autres appareils d'électroménager ou des appareils photo, sans que cela prenne une grande importance.

Cette chambre 5 x 7 a été baptisée Lafayette, mais provient d'un fabricant tiers. Sa présentation précise qu'elle est fabriquée en bois dur, séché au four, assemblée en queue d'aronde, renforcée par des coins en laiton et que la poignée est en cuir.

Advance**

## New SPEED GRAPHICS

All Speed Graphics feature both focal-plane and between-the-lens shutters, ground glass focusing, parallax-correcting tubular viewfinders, rising and falling front, interchangeable lens boards, spring backs and provision for internally coupled range finders. Anniversary models have in addition a drop bed, link-connected track, front standard locking lever, positive track lock, lateral and vertical shift of lens board and chrome protective band on body. Between both shutters, speeds from 1 sec. to 1/1000 sec. are available.
